

Workshop	Underwater Creatures
Recommended Year Groups	2-5
Subject	Science
Course Description	Students will learn about the characteristics of animals and their habitats and the importance of adaptation for survival. Using LEGO® bricks, children will construct different habitats and the animals that live there, complete with their specific adaptations.
Duration	45 minutes
Equipment	LEGO® Bricks
Capacity	30 students
Lesson Aims and Objectives	<ul style="list-style-type: none"> ✓ Identify that all living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of food, water and shelter ✓ Identify and name a variety of animals in their habitats ✓ Identify how animals are adapted to suit their environment in different ways and that adaptation may lead to evolution
